High Named Young Engineer of the Year

Indianapolis, Ind. (June 15, 2015) – The Indiana Society of Professional Engineers (ISPE) presented Matthew I. High, PE, its 2015 Young Engineer of the Year award in recognition of his outstanding contributions to the engineering profession and his community.

The award is awarded based upon the engineer's professional society activities, positions held, and achievements, along with that person's other technical society activities, positions held, and achievements. This award also considers the engineer's community and humanitarian activities, professional competencies, and achievements. In addition, the engineer's engineering career achievements are used to determine which person is selected for the award.

Matt received this award in honor of his excellent engineering contributions, primarily for heating, ventilation, air conditioning, plumbing and other utility-related systems. He currently works as a mechanical engineer in the Utilities Engineering Group at Purdue University. He also holds a BS in Mechanical Engineering Technology from that university.

Michael Fink, PE, a past-President of ISPE, presented the award to Matt on behalf of ISPE during its 2015 annual conference on June 12, 2015. ISPE President Scott S. Haraburda, PhD, PE, commented that Matt had, "made continual contributions to both the Society and to his community throughout the last several years, making him a worthy selection as this year's ISPE Young Engineer of the Year."

The National Society of Professional Engineers (NSPE) is the national society of licensed professional engineers from all disciplines that promotes the ethical and competent practice of engineering, advocates licensure, and enhances the image and well-being of its members. Founded in 1934, NSPE serves more than 35,000 members and the public through 53 state and territorial societies and more than 400 chapters. The ISPE is the state society that supports Indiana.
